

PH-6A Stud Welding Gun with Magnet Coil

PH-6A SOYER automatic stud welding gun with magnet coil

Description:

Due to its new feed system, the newly developed PH-6A automatic stud welding gun with magnet coil allows the semi-automatic and fully automatic feed of large and oversized welding studs of all types with or without flange. Studs of large dimensions can either be fed manually or fully automatically from the UVR-400 SOYER universal feeder via the feed chute into the stud holder. The PH-6A automatic stud welding gun is of a particularly sturdy and durable design and is even suited for the toughest professional continual operation. (For innovative special features, please see over).

Technical data:

Welding range:

Studs and RD/FD pins from M8 - M12 and/or 8 - 12 mm in diameter and 10 - 50 mm in length

Material:

Steel, stainless steel and heat-resistant steel

Welding process:

Short-cycle drawn arc stud welding in the radial-symmetric magnetic field

Type of cooling:

Automatic air cooling of the stud holder with simultaneous cleaning

Welding and control cables:

3 m highly flexible

Total length with support and magnet coil:

340 mm

Total height above grip:

200 mm

Total width:

80 mm

Weight:

2.6 kg, without cables

Subject to technical changes

Innovative Special Features of the PH-6A Automatic Welding Gun with Magnet Coil

Combined with a simple and practically-oriented operation, the new PH-6A automatic stud welding gun with magnet coil guarantees a maximum of technical performance advantages for the production of high-quality stud welded joints in series production.

Additional performance features of the PH-6A automatic stud welding gun with magnet coil include:

- ▶ Development and production fulfil all prescribed safety targets such as
 - the latest safety and accident prevention regulations (Act on the Safety of Technical Working Equipment)
 - electromagnetic compatibility (EMC Act)
 - European regulations (EU Directives on Machinery)
- ▶ Multifunctional applicability for capacitor discharge, drawn arc and short-cycle drawn arc stud welding when replacing the support with magnet coil by a standard support suitable for the aforementioned conventional stud welding systems
- ▶ Impact- and break-proof handle and synthetic housing
- ▶ Optimum protection against welding spatters, dirt and other contamination
- ▶ Welding, control and air cable guide in the gun handle
- ▶ Simple and safe retrofitting system for other stud dimensions
- ▶ Easily adjustable support legs for differing stud lengths
- ▶ Simple, manual lift adjustment by means of a special turning knob
- ▶ Absolutely precise stud positioning due to backlash-free sequence of motions
- ▶ Spirit level at the end of the gun to ensure vertical welding positions
- ▶ Long service life and long-term quality due to wear-free guide bush with ball bearing and special hardened and ground guide piston
- ▶ Invariably high quality performance even with uninterrupted continuous operation to ensure quality assurance procedures

Small, regular and spatter-free collar

Reduced penetration

Narrow fusion zone. No arc blow effect

Low-cost welding studs of premium quality
